5. Conclusions >

A high-angle, black and white aerial photograph of a sprawling urban landscape. The city is characterized by a dense, regular grid of streets and buildings. In the center, a prominent, tall, spire-topped building stands out. The city extends to the horizon, where a range of hills or mountains is visible under a clear sky. The overall impression is one of intense urban density and organized urban planning.

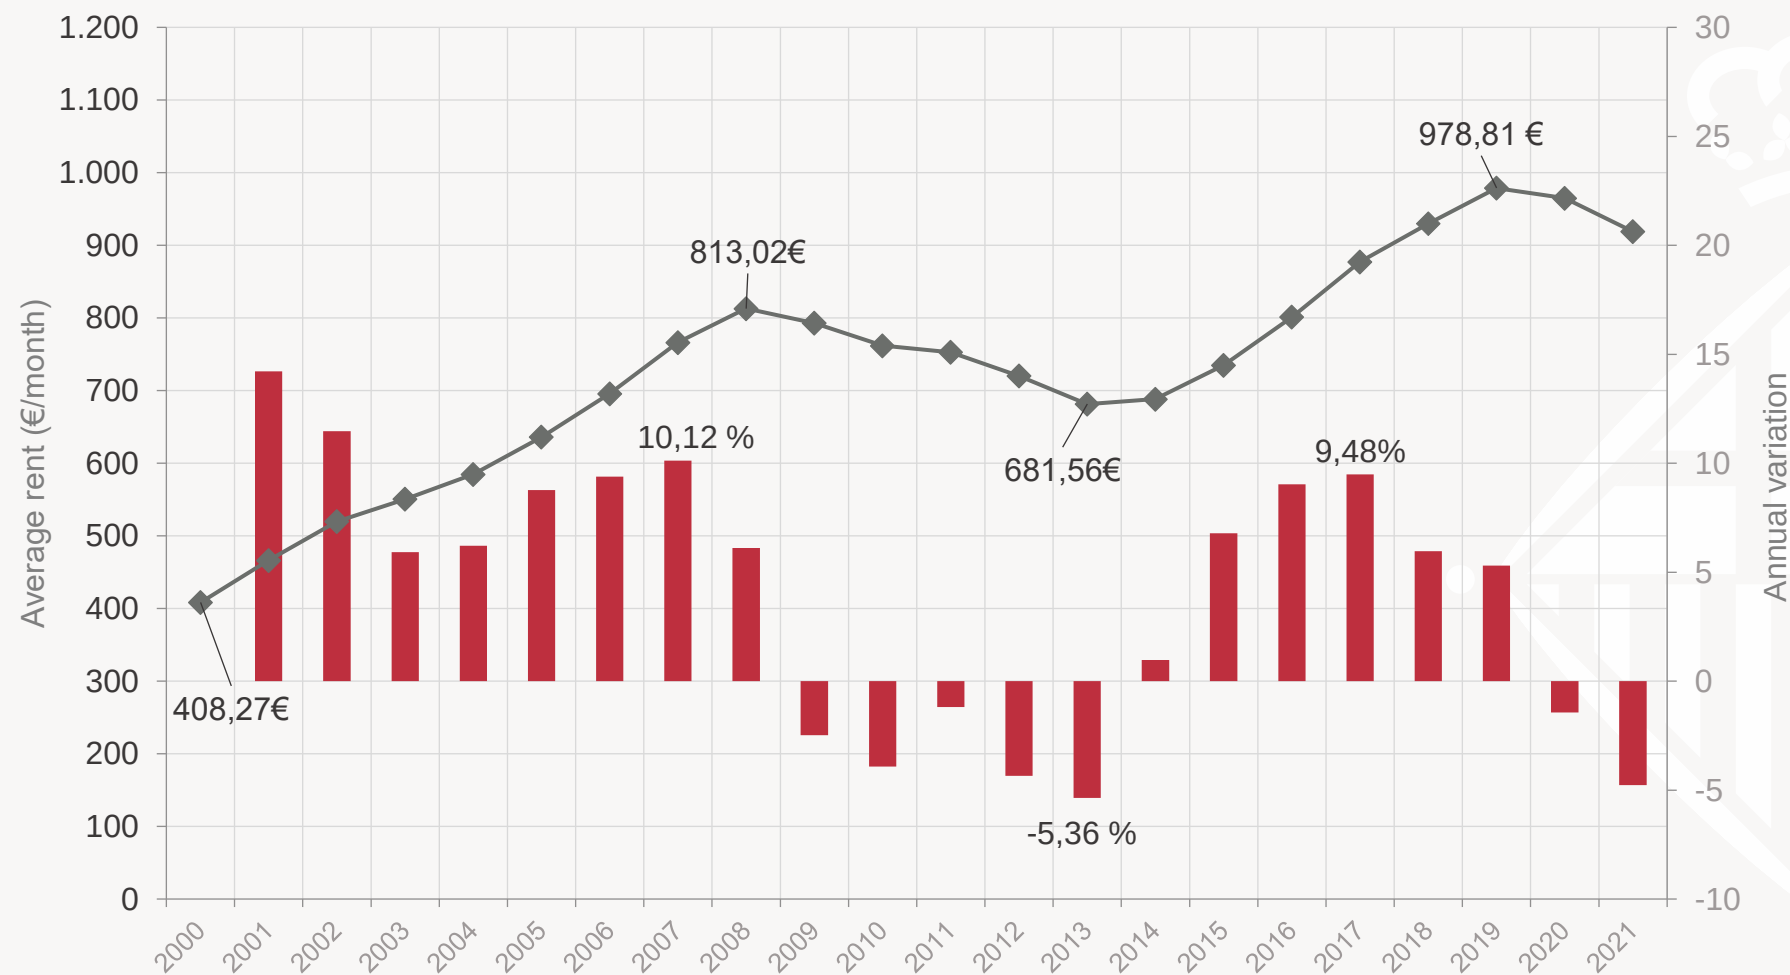

1

Inclusionary housing approach

Housing crisis

- Barcelona has experienced two bubbles, the real estate bubble and the rental bubble.
- Rents have risen 3 times more than the income of families in the last 20 years in Catalonia

Evolution of rents in Barcelona

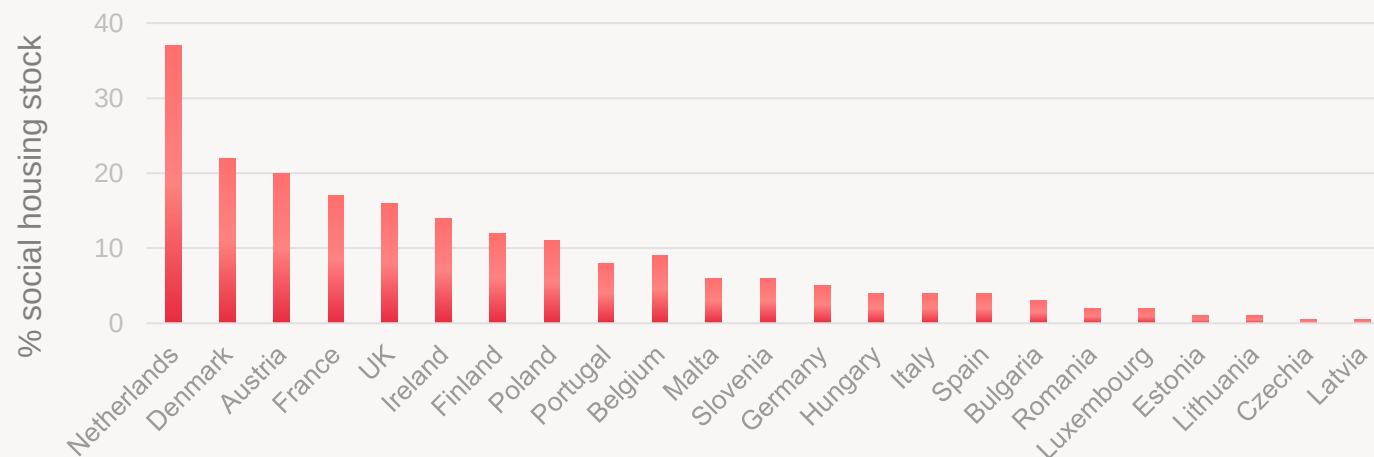

Source: Incasòl

Mission-oriented approach

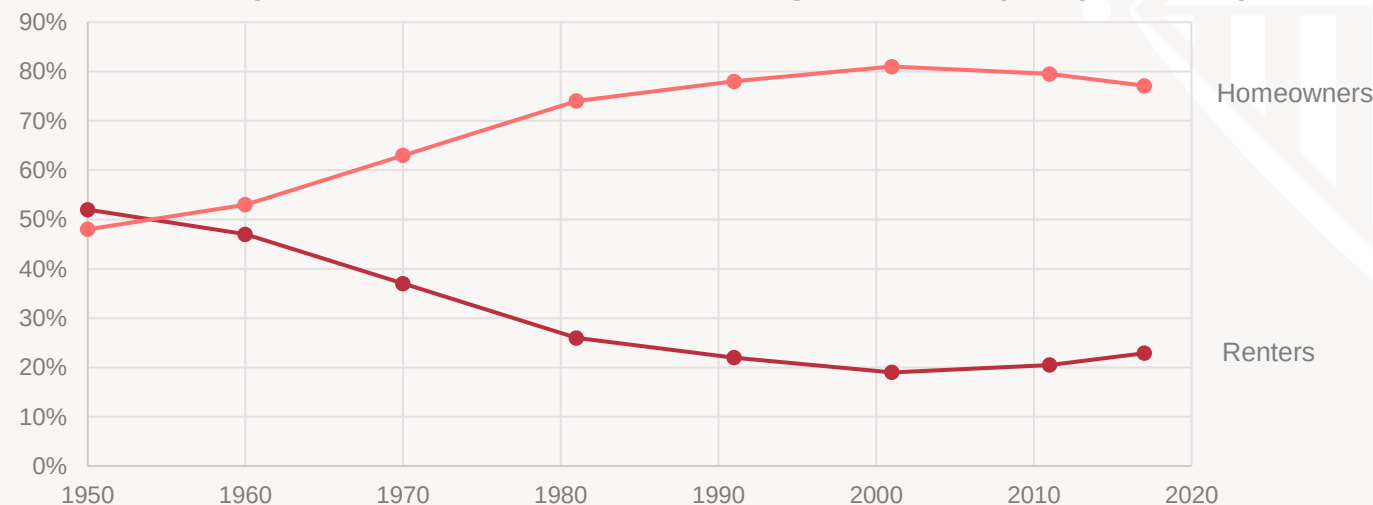

- Spain needs 2.6 million affordable housing units (VPO/HPO) in rental (or other non-especulative tenures) in order to converge with the rest of EU (15% of the housing stock). **In Barcelona there is a 90,000 units deficit.**
- Rental public housing in Barcelona represents around **1.5% of the overall housing stock. 5% of the rental stock.**
- Non-market housing (public, coop, non-profit and limited profit) + rent subsidies are used by **17% of the tenants of the city** (12% in 2015).
- Policies that support homeownership have made it difficult for most of society to access housing. **We need to diversify housing tenures.**

Percentage of social housing in OECD countries

Source: OCDE Affordable Housing Database

Population distribution across housing tenures in Spain (1950-2017)

Source: INE

An emerging model

- › 100% private management has proven to be a failure.
- › 100% public management is not a virtuous model either.
- › Housing is too important to be left exclusively in the hands of the market or the State.
- › Effectiveness and efficiency will result from a combination of public, private and community solutions.

OUR IDEAL ... OUR PATHWAY

A 3/3 providers system

- ▶ **Private**
- ▶ **Public**
- ▶ **Communitarian** + **Commercial**
non-profit limited-profit

2 operational approaches

- ▶ **New development**
How to do it with a high percentage of public, social and affordable housing?
- ▶ **Urban regeneration**
How to intensify the availability of affordable housing in high-quality urban settings?

2

Increase the stock of social
and affordable housing

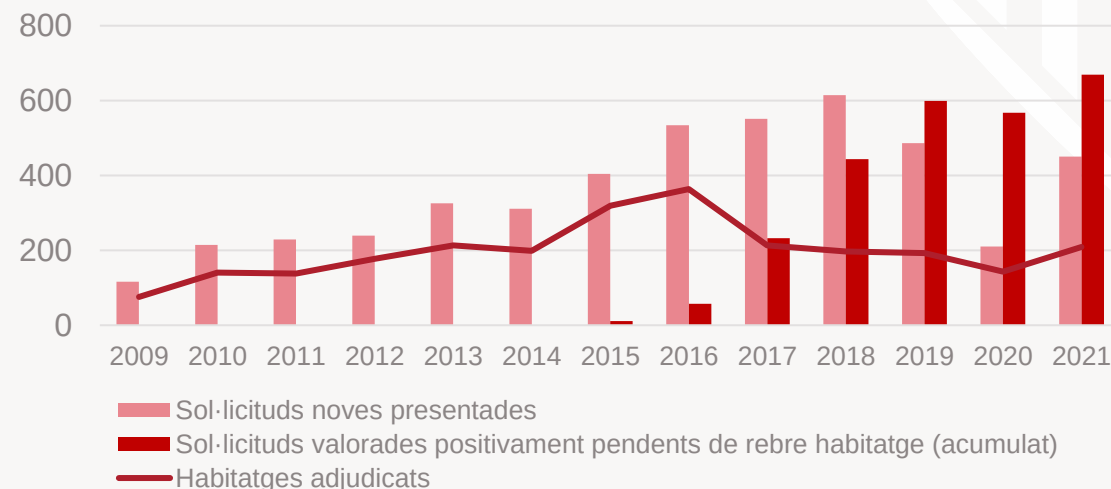

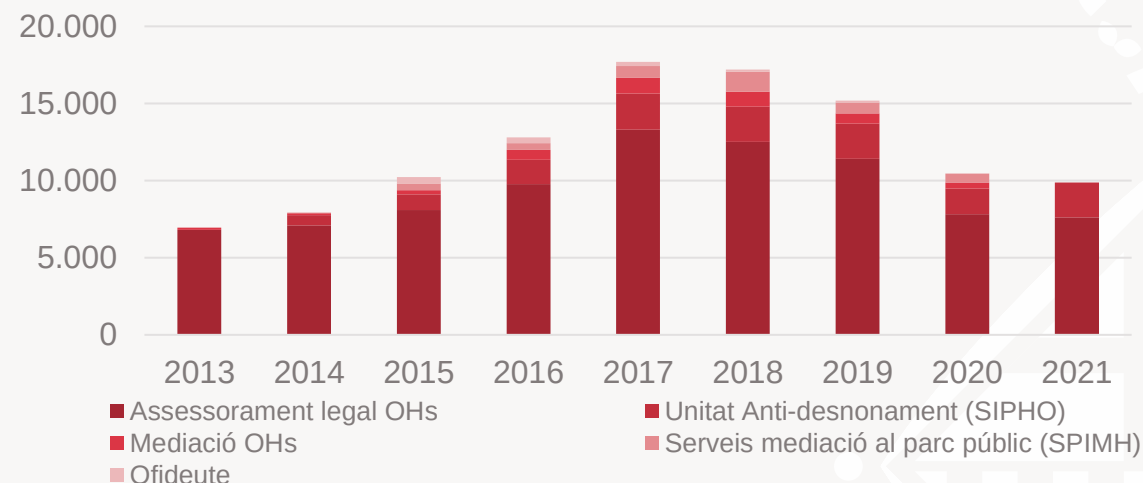

Prevent and address housing emergencies and residential exclusion

➤ Mediation services:

- **Legal counseling** and mediation in rental contracts and relationships by the Housing Offices
- Anti-eviction unit (**SIPHO**)
- Mediation services in public housing (**SPIMH**)
- *Ofideute* (mortgage holders protection scheme)

➤ Social Emergencies Board – **Mesa d'Habitatge d'Emergència**

- The City of Barcelona has provided **76% of the housing units** and the Generalitat (Regional Government) the 24%. The distribution should be 40%-60% accordingly.
- The Generalitat has accumulated a **deficit of 1,185 units** between 2016-2021.

2.1 Land and development policy

2.1.1 Duration of the affordability

- › **Goal:** all affordable housing units (VPO/HPO) remain permanently affordable.
 - Between 1940 and 2011, 12,836,692 units were built in Spain. Half of them (6,424,018) were HPO. **Almost all of them** (but 350,000) **have lost their affordability and have joined the private market.**
 - País Vasco, Illes Balears, Catalunya and in imminently Navarra are the first four regions to regulate **affordable housing in perpetuity**. **1 out of every 4 Spain's inhabitants.**
 - Catalunya: Decret-Ilei 17/2019, de 23 de desembre, de mesures urgents per millorar l'accés a l'habitatge.

2.1.2 Affordable housing zoning requirements

- **Goal:** increase land reserves for VPO/HPO to promote social mixing and avoid segregation.
- Additionally, facilitate that **at least half of the affordable units are in rental.**
- Barcelona and the Metropolitan Area (AMB):
 - **HPO requirements in green fields: 40% (20% in rental).** The minimum statewide is 30%, with no minimum in rental.
 - **HPO requirements in brown fields: 40% (20% in rental).** The minimum statewide is 10%, with no minimum in rental.
 - **HPO requirements in existing buildings or plots: 30%** (no rental requirement). There is no minimum statewide. Pioneering instrument at the State level .

2.1.3 MPGM 30% in consolidated urban land

- 30% affordable housing requirement in most **major building renovations and new constructions in exiting plots.**
- It applies to all multifamily projects citywide bigger than 600sqm of buildable surface, with some exceptions.
- **Game changer**, in a context in which the city cannot grow outwards and needs to focus on urban regeneration processes.

Preliminary results (2018-2021):

- The number of building licenses is like that of previous years.
- There has been a significant increase in the % of HPO units built.

2.1.3 MPGM 30% in consolidated urban land

► **Preliminary results.** Applications for building licenses 2016-2018.

Imatge d'un edifici en rehabilitació a Barcelona FRANCESC MELDON

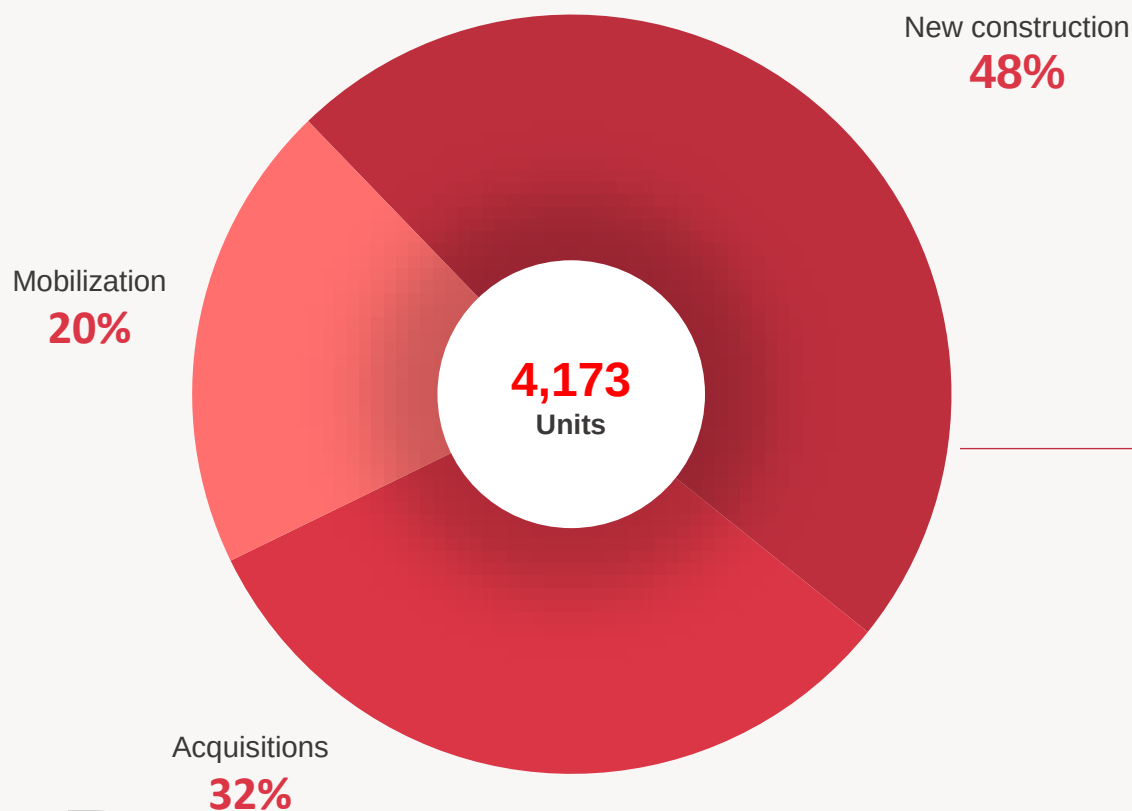

BARCELONA Després d'una campanya d'inspecció a 1.368 obres, l'Ajuntament de Barcelona ha determinat que n'hi ha 17 que han fet trames per evitar destinar el 30% dels pisos a habitatge assequible, com preveu la modificació del Pla General Metropolità (MPGM), vigent des de finals del 2018 en casos de noves promocions o grans rehabilitacions. El govern municipal concreta que aquestes obres sumen 222 habitatges, una setantena dels quals haurien de tenir un

2.2 Development of public and public-private/communitarian social and affordable rental housing

Right to Housing Plan 2016-2025

› Instruments for the increase of the affordable housing stock

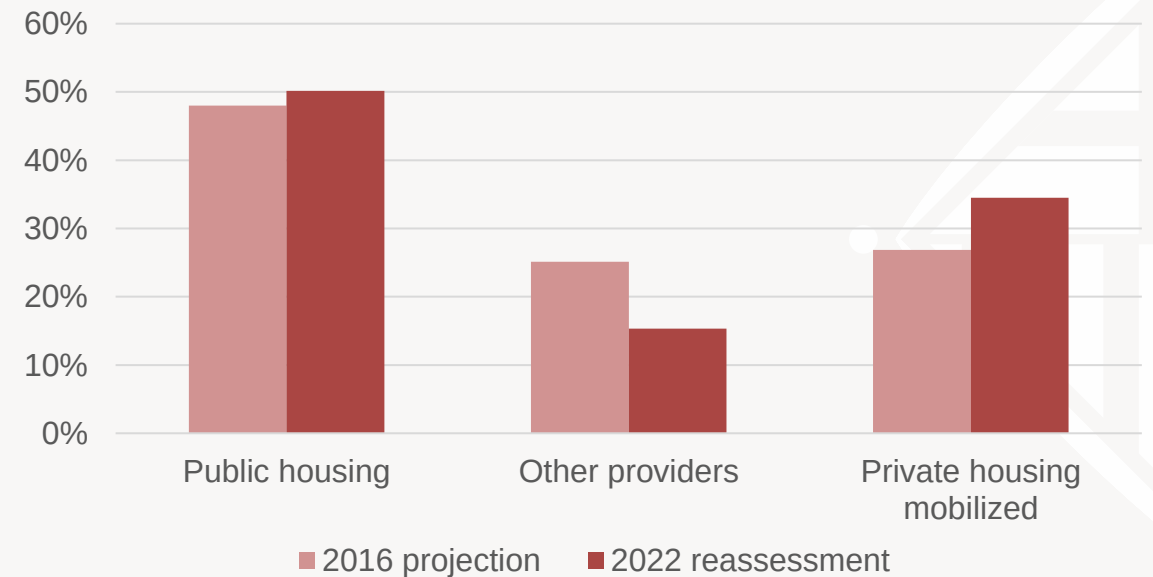

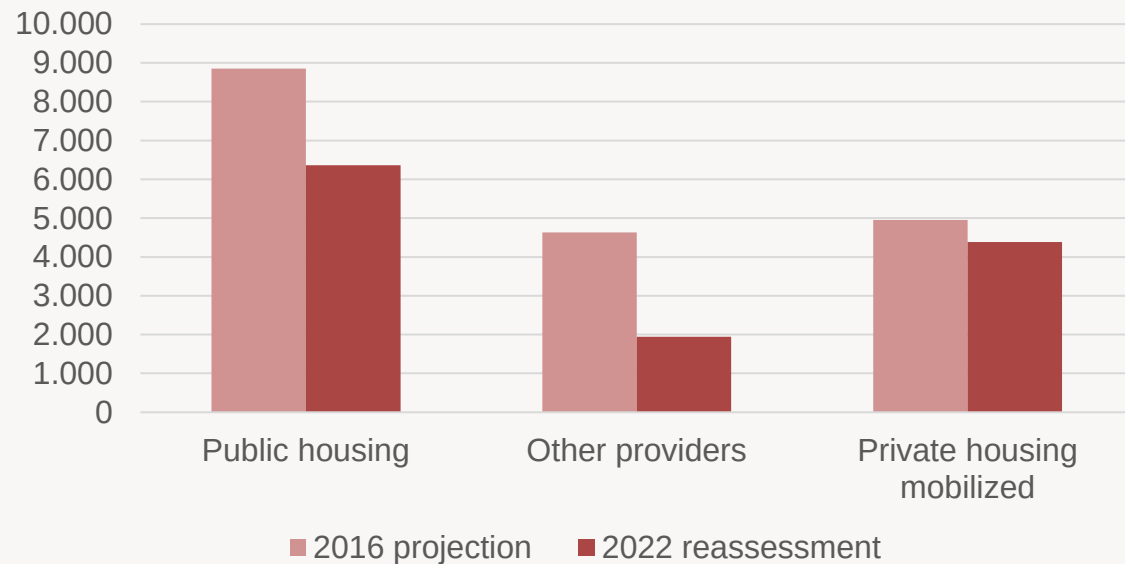

Between **2015/12** and **2022/6** the city's affordable housing has increased by **4,173 units**, which have provided housing to **10,432 persons**.

Half of them result from new construction while the other half come from acquisitions and private units temporarily mobilized as affordable housing.

69% of the new affordable housing has been developed by the City Council.

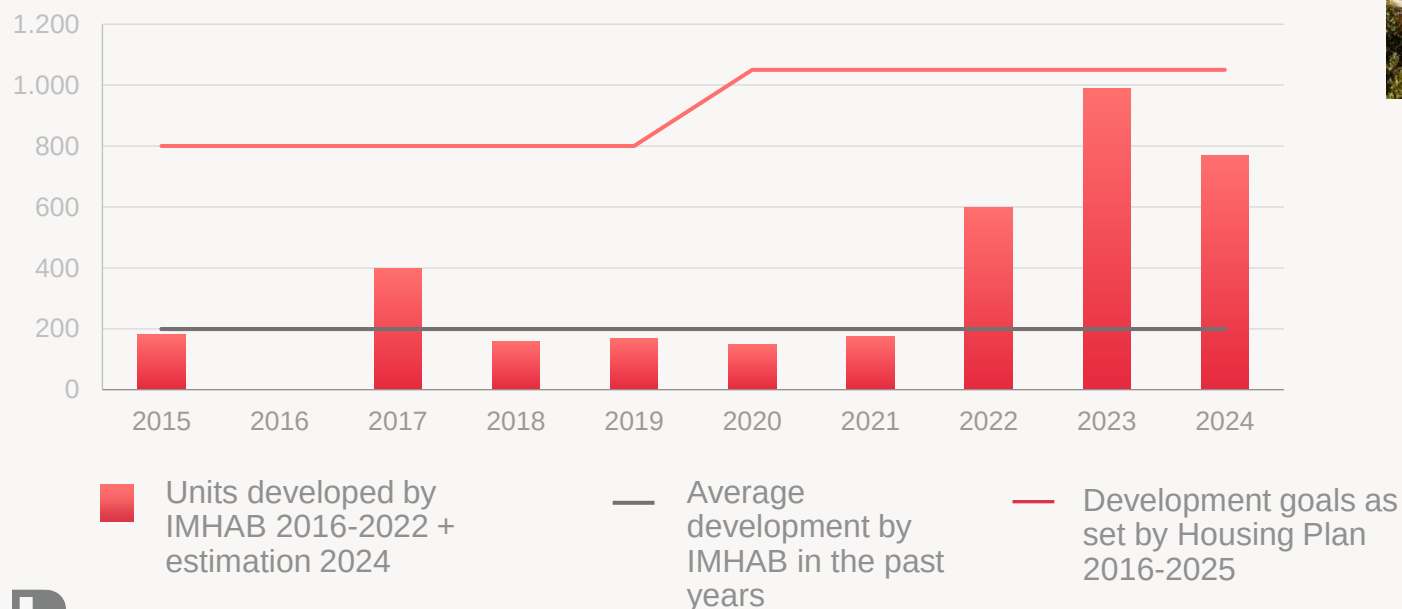

Right to Housing Plan 2016-2025

- The **rate of production** of social and affordable housing has been lower than the initial projection in 2016.

2.2.1 Public development

- › IMHAB has increased exponentially its housing **development and management capacities**, 80% of the new units being in rental.
- › At 6/2022 there were **107 projects** underway on municipal land/buildings, which will generate **6,198 units** between 2016-2025.

Bon Pastor

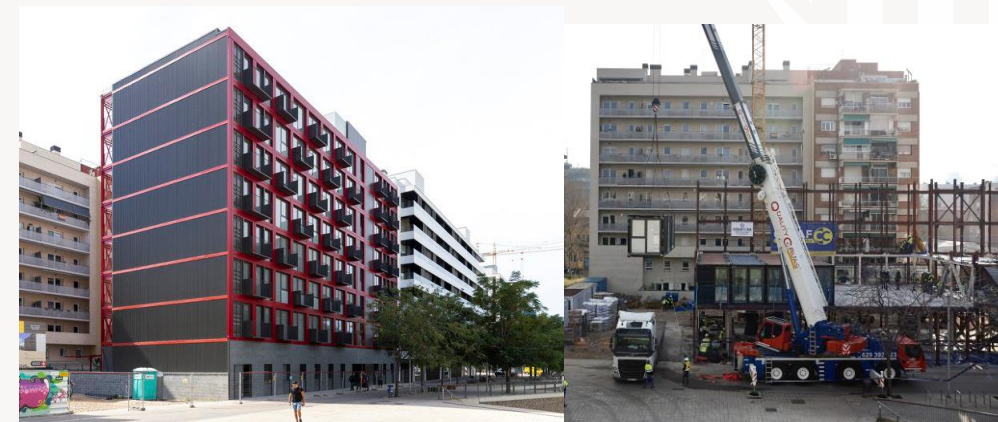

C/ Tànger

2.2.1 Public development - Industrialization

- Innovation through **industrialized construction program (more than 500 units, 10% already finished)** is allowing to:
 - **Minimize the environmental impact** of the buildings through their life cycle.
 - **Reduce time. From 5 to 2 years.**
 - **Reduce costs.** Still a goal to achieved. Now similar costs.
 - **Improve the quality.** Control and efficiency of the construction works.
- Development has also accelerated thanks to the use of **joint project + construction procurement.**
- We had also fostered **cooperation between private companies** in order to attend to our tenders.

APROP Ciutat Vella

APROP Glories

2.2.2 Public-private-community partnerships

Framework Agreement with Social Providers (ESAL)

- › Cohousing development through 3 phases:
 - **Bilateral agreements** for 2 pilot projects (2014 and 2015): 33 units.
 - **Competitive tenders** (2016 and 2019): 217 units.
 - **Partnership between City Council-Cooperatives-Foundations** (2021): 1.000 units in 10 years.
- Long-term lease on municipal land (99 years).
- 60% rental - 40% cooperative.
- Municipal returnable subsidy (7-16%).
- Support in the access to financing from ICF and ICO.
- End goal: **Community Land Trust**.
- **130 families already living in these cooperatives housing units.**

2.2.2 Public-private-community partnerships Framework Agreement with Social Providers (ESAL)

**Financial Framework Agreement with ICO + ICF
for the development of ESAL: 140 millions for
1,000 collaborative housing units**

oelDiario.es
Fotografía a partir de todos los días 2021

Barcelona acuerda un crédito público de 140 millones para que fundaciones y cooperativas construyan vivienda social

El convenio con el ICO y el ICF facilitará la construcción y rehabilitación de 1.000 viviendas para ampliar el parque público, de las cuales el 60% serán para alquiler social y el 40% para convivencia cooperativa

VIVIENDA | Un derecho básico

Jordi Collina

Piso de una promoción de vivienda en el barrio de Barrio, 11, que estará habitada a partir de agosto, ayer.

El Instituto de Crédito Oficial y el Institut Català de Finances aportarán la suma al 50% y el ayuntamiento cederá temporalmente el suelo, que siempre será de carácter público.

Préstamo de 140 millones para hacer 1.000 pisos en BCN en 10 años

TONI SUST
Barcelona

El gobierno de Ada Colau ha llegado a un acuerdo con el Instituto de Crédito Oficial (ICO) y con el Institut Català de Finances (ICF) para que abran una línea de crédito de 140 millones de euros entre ambas entidades. La suma se dedicará a obras de rehabilitación y construcción de vivienda social en formato de alquiler y convivencia en suelo municipal, y serán promovidas por organizaciones sin ánimo de lucro: básicamente, fundaciones y cooperativas, que son las que reciben los préstamos. El problema de la vivienda en Barcelona es evidente, y la tendencia es que haya cada vez más demanda de alquiler y que los precios sean más caros.

El convenio, firmado y anunciado ayer en el ayuntamiento, prevé que con los citados 140 millones se construyan y rehabiliten 1.000 viviendas en un periodo máximo de 10 años en la capital catalana. Según el acuerdo, el 60% de

los pisos se destinarán a alquiler asequible, un precio medio entre el de mercado y el de vivienda social, y el 40% restante, a convivencia.

En el primer caso, una entidad sin ánimo de lucro promoverá las viviendas y las ofertará en alquiler a un precio que está en un punto medio entre el de mercado y el social. En concreto, a 7,5 euros el metro cuadrado. La idea es que esa promotora no gane dinero, pero que tampoco lo pierda. En el segundo, un grupo de personas se unirán para afrontar, desde su planificación, una promoción determinada en la que residirán. Al igual que en el otro caso, los inquilinos afrontarán un alquiler de 7,5 euros por metro cuadrado. En los dos modelos, los vecinos potenciales deberán reunir ciertas condiciones: no tener una vivienda y estar en el registro de solicitantes de vivienda protegida.

99 años de cesión

En ambas situaciones, el suelo nunca llegará a privatizarse, como sucedía en el pasado, cuando la obra pública de las administraciones de

toda España era generalmente de venta y perdía la protección pasado un periodo. En estos casos, la cesión del uso del suelo es por 99 años. Pasado ese periodo, el consistorio deberá decidir si recupera la gestión de las viviendas o promueve la cesión. Las 1.000 viviendas pasarán a engrosar el parque público municipal, en crecimiento considerable desde que Colau llegó al gobierno pero todavía muy lejos de alcanzar

Los inquilinos pagarán un alquiler entre el social y el de mercado: 7,5 euros por metro cuadrado

Los requisitos, no ser propietarios y estar inscritos como solicitantes de vivienda protegida

las cifras que se consideran necesarias. De hecho, al ritmo actual faltan décadas para que esos números sean significativos en el doble sentido en el que se espera que lo sean: proviniendo de vivienda pública a las familias que no la tienen e influyendo con su oferta en el sector privado para que los precios bajen.

Herencia recibida

Al iniciarse el acto de presentación del acuerdo, la alcaldesa recordó que Barcelona en Comú se encontró con solo un 1% de vivienda pública. Resultado de la política antes citada, de la que participaron las administraciones de todos los signos políticos, que no apostaron por conservar a la vivienda que construían con recursos públicos. La alcaldesa recaló que los obstáculos para que el objetivo avance suelen ser el suelo y la financiación, que el convenio garantiza para las entidades. «Es un paso de gigante con el que abrimos camino», dijo al respecto. Colau presentó el pacto junto con Rosario Casero, directora general de Negocios del ICO, y Jordi Oli-

va, consejero delegado del ICF. La fórmula es una muestra de colaboración público-privada. Según las condiciones que se conocieron ayer, la financiación cubrirá el 100% de los proyectos, con un máximo para 2022 de 120.000 euros por vivienda. Las entidades podrán devolver el préstamo en un periodo de hasta 30 años. Las condiciones (euri-bor + 2%) se pueden consultar en detalle en vivienda.social@ico.es.

Oliiva agradeció al ICO un acuerdo previo que permite que el ICF reciba fondos para afrontar la línea de crédito. Casero explicó que el procedimiento administrativo de la cesión de suelo del ayuntamiento lleva aparejada la solvencia de las entidades que asumen la empresa de hacer las viviendas. Casero se refirió al convenio ESAL, en el que participan la Asociación de Gestores de Vivienda Social, la Federación de Cooperativas de Vivienda Habitacional, la Red de Economía Social y Solidaria, y la Coordinadora de Fundaciones de Vivienda Social Colababit.

El convenio prevé la cesión gratuita por parte del ayuntamiento de suelo y edificios municipales a rehabilitar en derecho de superficie a 99 años (es decir, uso por ese tiempo antes de que vuelva a estar a disposición del consistorio) y otorga subvenciones municipales (entre el 7% y el 15% del coste de construcción o rehabilitación) a promotores sociales, cooperativas en cesión de uso y fundaciones, para la construcción o rehabilitación de vivienda en régimen de alquiler y de convivencia. ■

2.2.2 Public-private-community partnerships

Habitatge Metròpolis Barcelona

- PPP between BCN City Council (25%) the Metropolitan Area of BCN (AMB, 25%) and private partners selected through a public tender (50%): TOTAL PARITY IN RIGHTS & OBLIGATIONS
- Private partners –NEINOR and CEVASA – selected in 2021.
- Goal: 4,500 rental VPO/HPO (8 euros/m2) in 8 years.
- Land: provided in 75 years leasehold by the Administrations.
- Good faith non-performing units covered by the Administrations.

Sociedad en Barcelona
Neinor y Cevasa ganan el primer gran concurso de vivienda pública para alquiler

Se asociarán al 50% con Habitatge Metròpolis Barcelona para construir 4.500 casas hasta 2027

La inversión alcanzará entre 650 y 700 millones de euros

A un precio de 8,97 euros por metro cuadrado como máximo

“Se prevé que puedan acceder alrededor de 1.600 personas. Por otra parte, el proceso de construcción generalizará el alquiler de 1.000 viviendas de trabajo”, según afirman por el Ayuntamiento de Barcelona.

Los socios tendrán un independiente de consenso

Neinor y Cevasa ganan el concurso para promover 4.500 VPO en Barcelona

El primer ejecutivo de Cevasa, Borja García-Estigarribia, y el de Neinor, Daniel Muñoz.

Fuentes del mercado estiman que el proyecto supondrá una inversión de hasta 700 millones

La facturación por las rentas netas. Además, se comprometen a no cobrar dividendos preferentes.

El calendario de promoción se divide en cuatro etapas. En la primera se construirán 140 viviendas para 1.600 residentes en Barcelona (en La Marina del Prat Vermell, La Sagrada y Sant Andreu). En la segunda, se construirán 1.400 viviendas para 1.600 residentes en Barcelona (en La Marina del Prat Vermell, La Sagrada y Sant Andreu). En la tercera, se construirán 1.400 viviendas para 1.600 residentes en Barcelona (en La Marina del Prat Vermell, La Sagrada y Sant Andreu). En la cuarta, se construirán 1.400 viviendas para 1.600 residentes en Barcelona (en La Marina del Prat Vermell, La Sagrada y Sant Andreu).

1,324 units purchased 2021/5/12 - 2022/6 (145 M€)

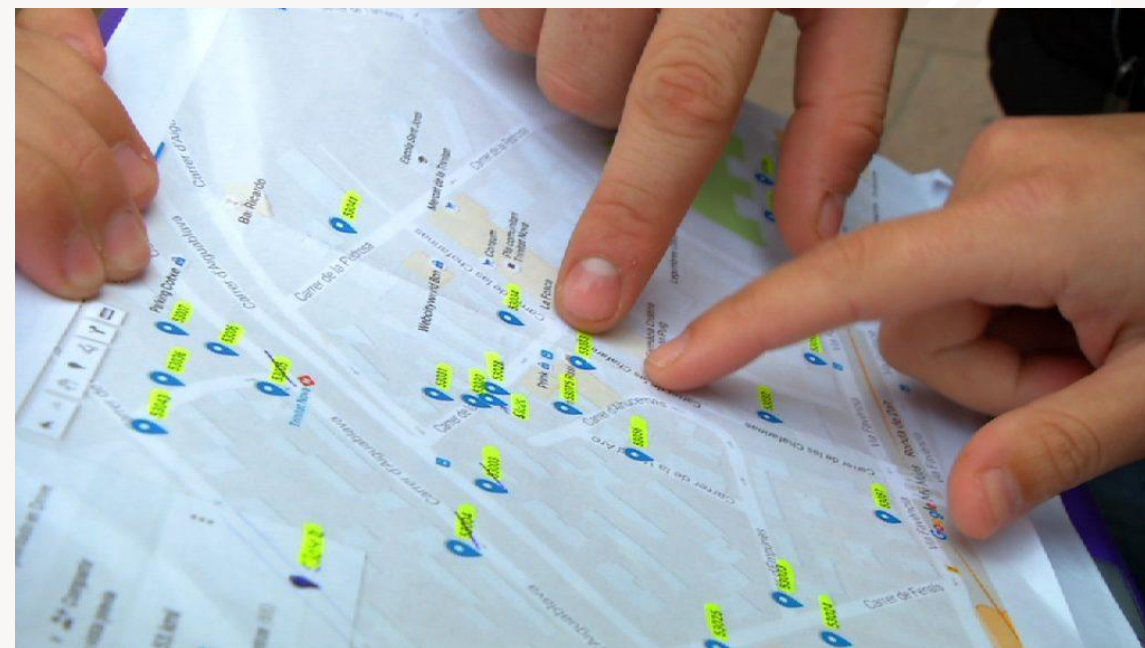

2.4 Temporary mobilization of private housing

Vacant housing census

- INE's Housing Census from 2011 **overestimated vacant housing (10%)**.
- An extraordinary municipal census using water consumption data and the municipal registry + fieldwork allowed to identify **10,052 vacant units (1,22%)**.
- **881 unlicensed touristic apartments** were also identified.
- **1,166 units presented deficiencies** that required refurbishment.

2.4.1 Rental housing pool (Borsa)

- Public intermediation program.
- Goal: **AFFORDABLE RENTAL**
- More than 1,000 units administered in 2022.

INCENTIVES FOR APPLICANTS

Longer rental contracts

- ✓ Affordable rental
- ✓ No additional expenses. The landlord takes on:
 - Community expenses
 - Local property taxes
 - Turning on utilities
- ✓ No transaction costs (deposit, 1st month, administrative costs) according to social services evaluation

Home insurance

Legal and technical advice

INCENTIVES FOR LANDLORDS

Competitive rental price

Rental income guarantee

- + legal defense
- + Follow-up/mediation
- Rent intermediation (optional)
- Temporary or permanent voucher if risk of non-payment

Home insurance

Occupancy permit and energy efficiency permit

Renovation subsidies for up to 20,000€

- ✓ Discount on local property taxes
- ✓ Incentive for empty apartments: 1,500€
- ✓ Incentive for keeping existing tenants (w/o outstanding payments) in place: 1,500€
- ✓ Incentive for keeping existing tenants (w/ outstanding payments) in place: up to 6,000€

Legal and technical advice + follow-up + mediation

2.4.2 Cession program

› Program managed by **Hàbitat 3 Foundation**.

- Goal: **SOCIAL RENTAL**
- Payment of the rent is guaranteed to the owner.
- Refurbishment subsidies.
- Renters pay according to their income thanks to additional municipal subsidy to cover the gap.

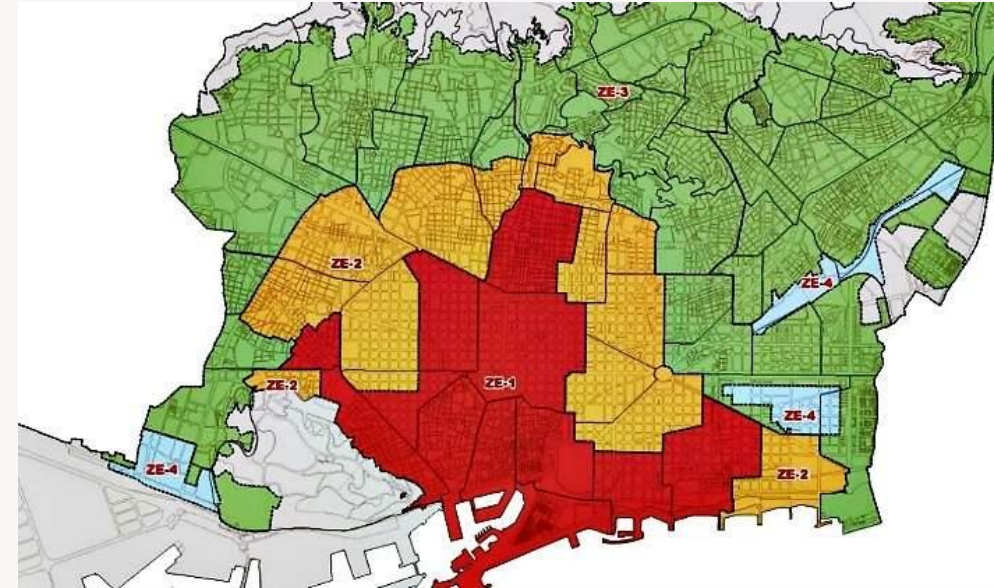

FUNDACIÓ
HÀBITAT 3

Habitatge per a la inclusió social

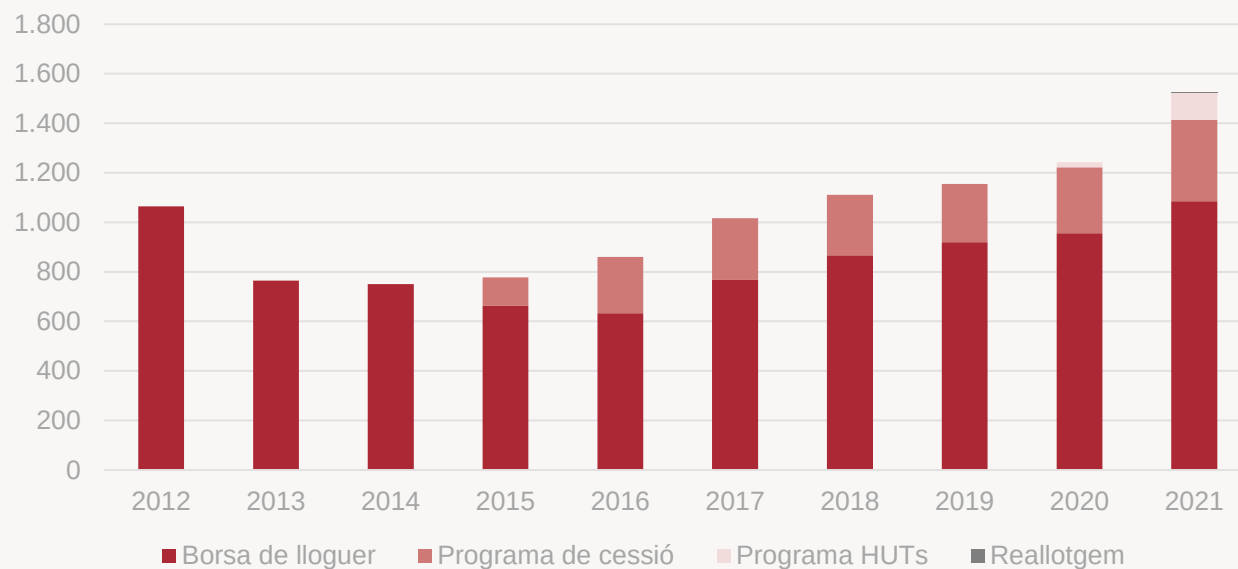

2.4.3 Touristic apartments (HUTs) mobilization program

- The **Touristic Apartments Especial Urban Plan** (PEUAT) establishes 3 areas for the regulation of touristic apartments:
 - Decrease (licenses are not renewed).
 - Stabilization (a cap is set on the number of existing licenses)
 - Potential growth
- Goal: **Mobilize vacant touristic apartments** as a consequence of the COVID-19 pandemic.
 - Rents between 700€ and 1,200€ per month depending on the time the unit is made available to the City.
 - Temporary rental contracts between 12 months and 3 years.
 - Social support by Hàbitat 3 Foundation.
- **150 units** were mobilized by 2021/12. **RESIDUALIZATION**

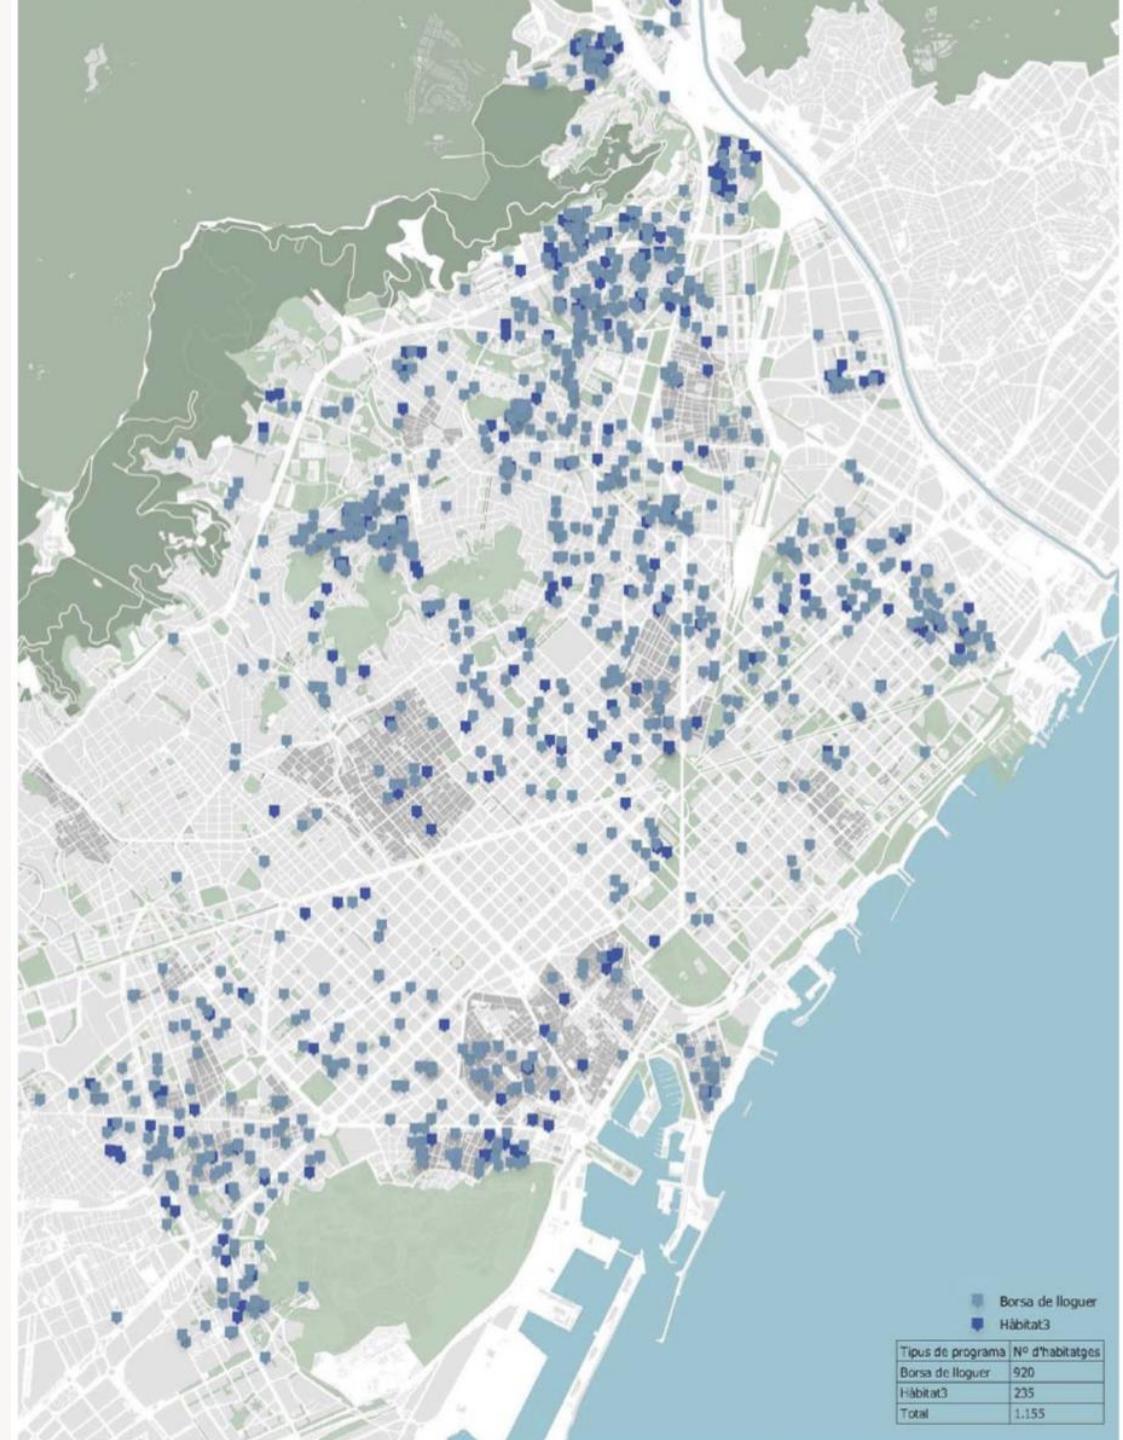

2.4 Temporary mobilization of private housing

TOTAL NUMBERS AND TERRITORIAL SCOPE

1,570 mobilized units 2021/12 - 2022/6 (200% increase)

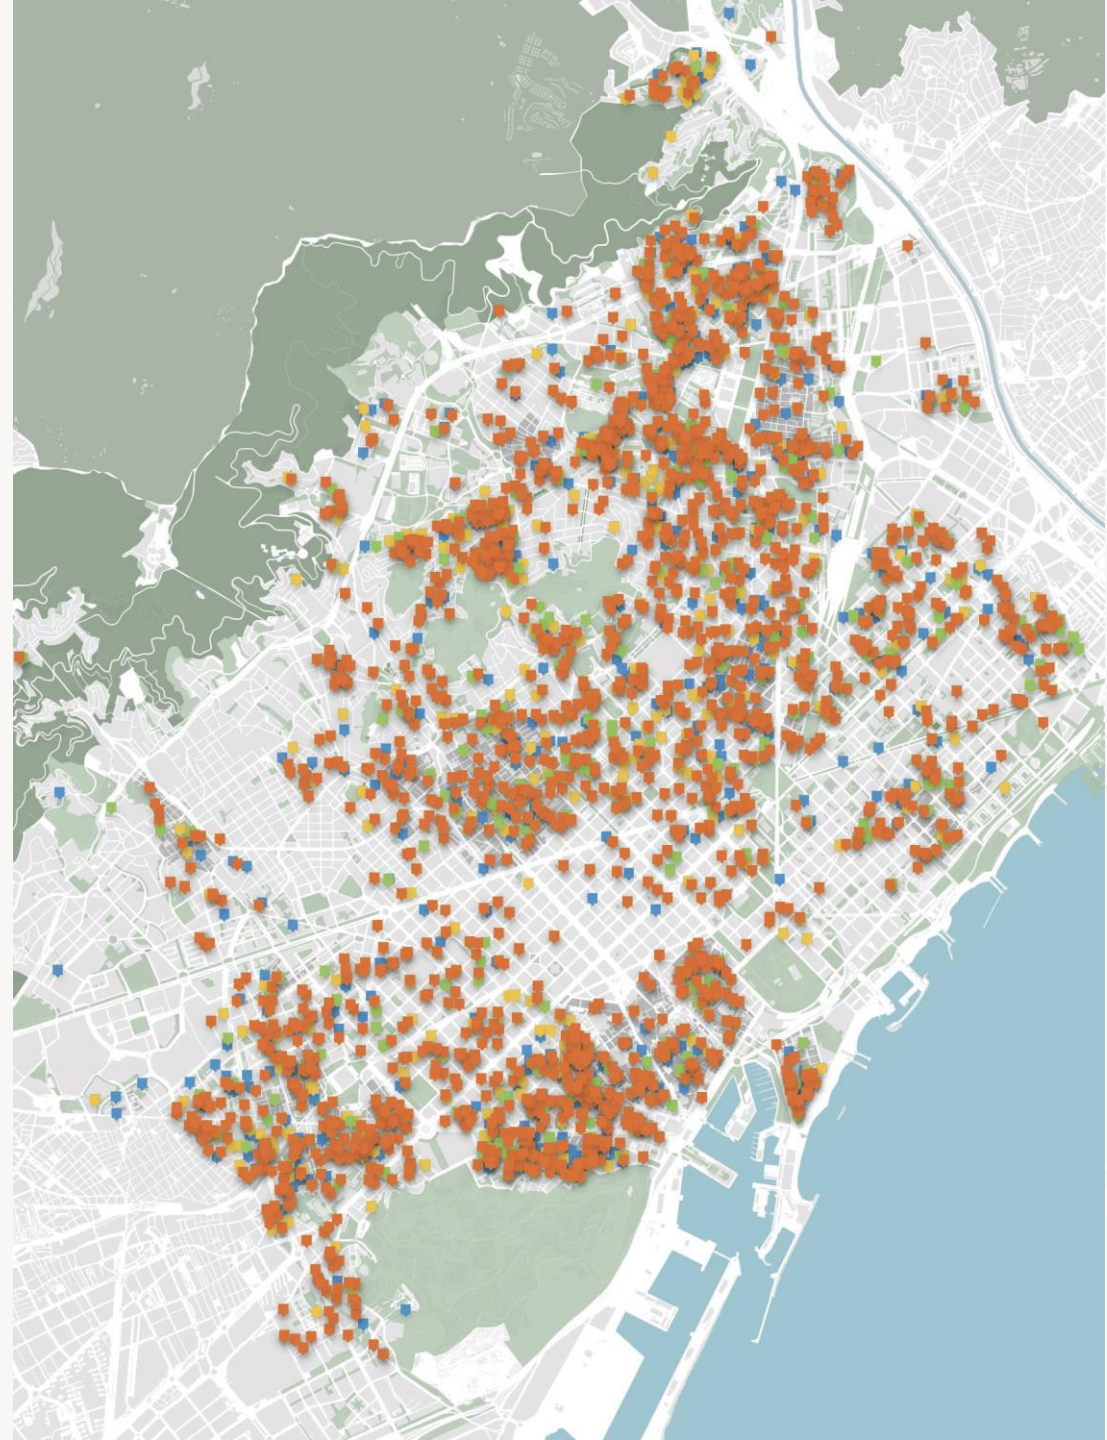

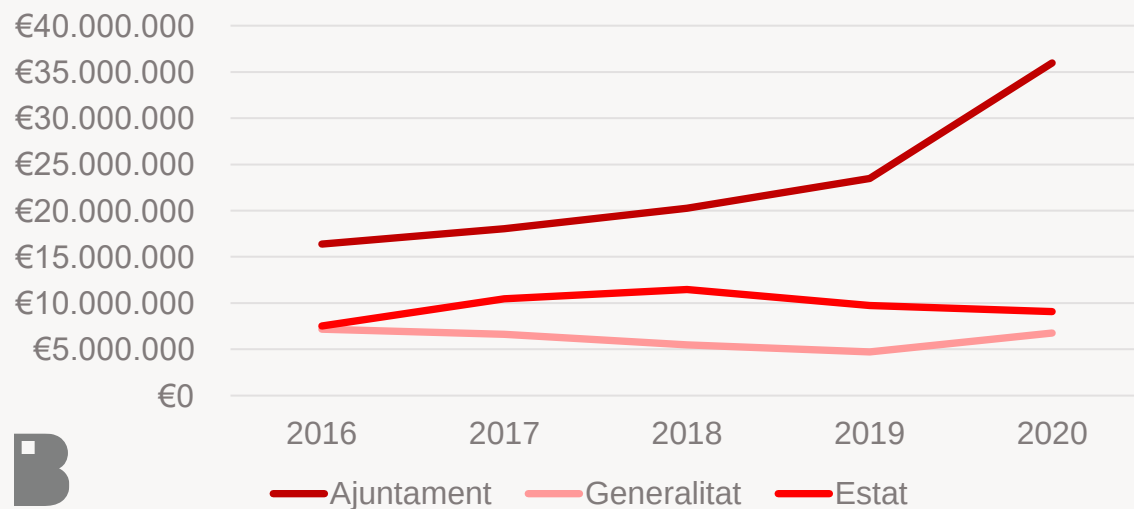

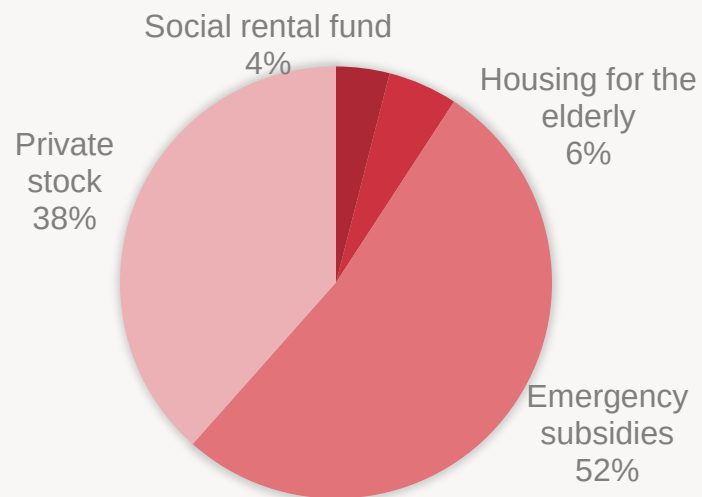

2.5 Rental subsidies

2.5 Rental subsidies

- From 18,208 subsidies in 2016 to **29,814 in 2021**.
- 120M€ during the period between 2016-2020.

Summary of strategies to increase the affordable housing stock

Development

- 8,000 units
- 80% rentals – 20% leaseholds
- 67% public development – 37% PPPs
- 1,200M€
- 19,000 residents

Acquisition

- 1324 units
- 100% rentals
- 145 M€

Temporary mobilization of private units

- 1,570 units
- 100% rentals
- 25M€

- The **public housing stock** has grown from 7,500 units in 2015 to **10.912 in 2022/6**. A similar increase (plus 40% is expected in 2025/12)
- **29,814 households receive rental subsidies 2022/6** (18,208 in 2015/12).
- **17,3% of the rental households are covered by public action** (12% in 2021; a plus 40% increase).

Renovation policies

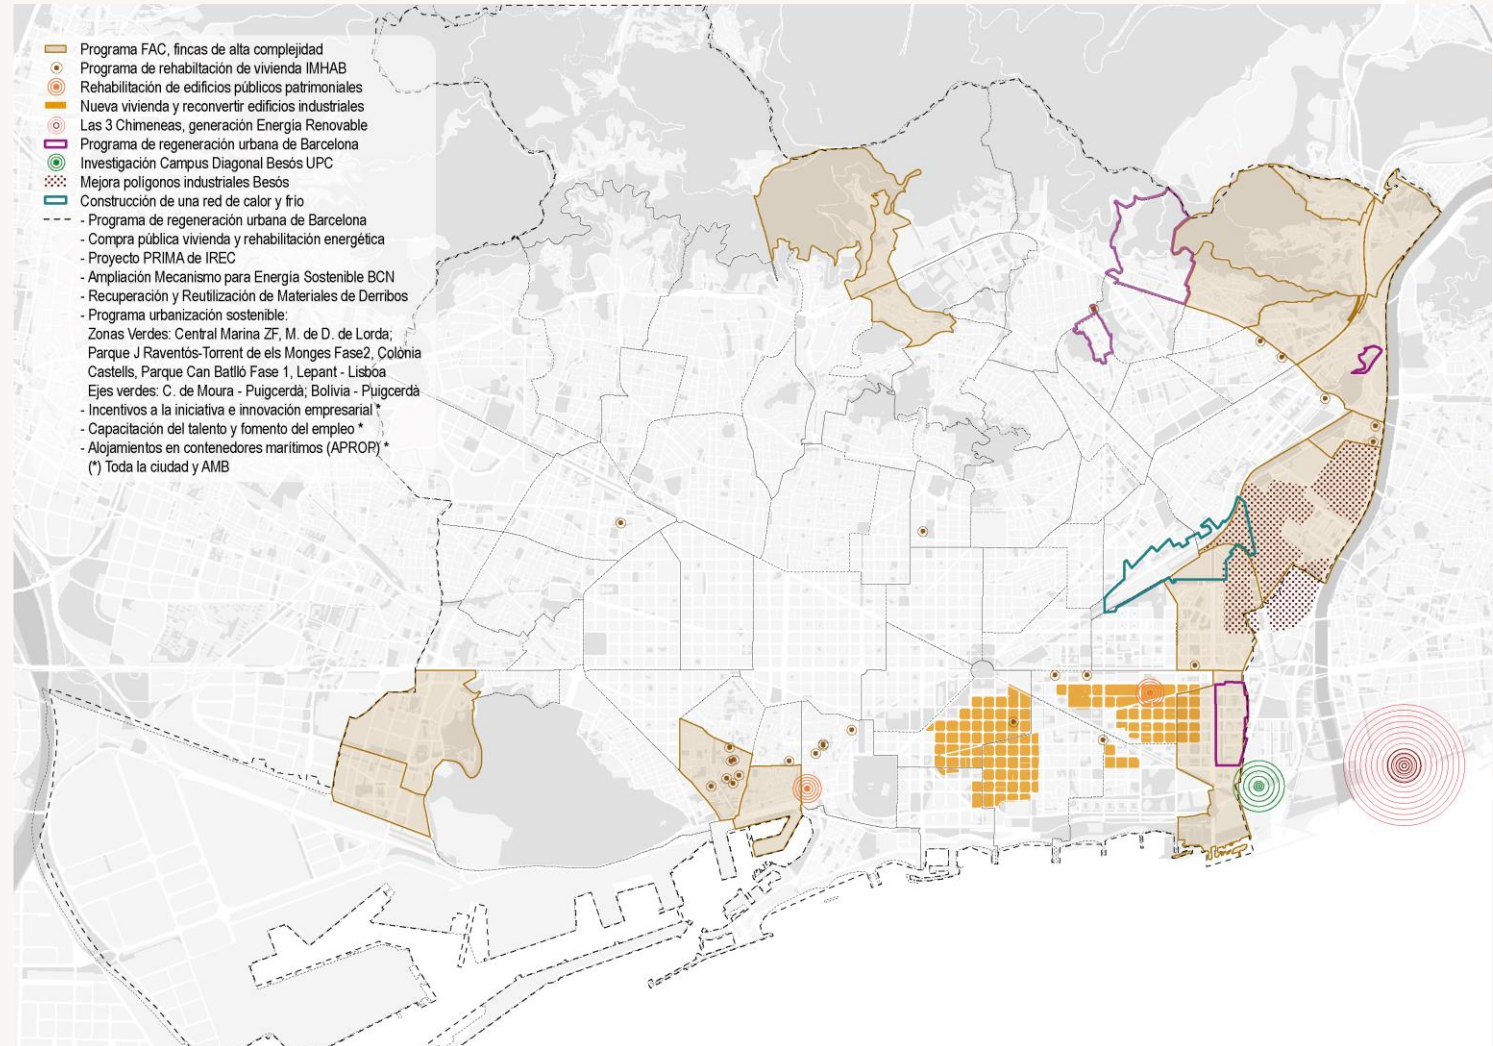

3.1 Renovation subsidies

- › 146 M€ in the period 2015-2021.
- › Impact of more than 383 M€ on the City's GDP.
- › Some 63,000 households benefited.
- › 130 M€ EU Next Gen 2022-2024

3.2 Urban regeneration programs

- High Complexity Estates. **FACs**
- Urban Regeneration and Renovation Areas (**ARRUs**)
- **Renewable Barcelona 2030 Plan** (Next Generation EU).

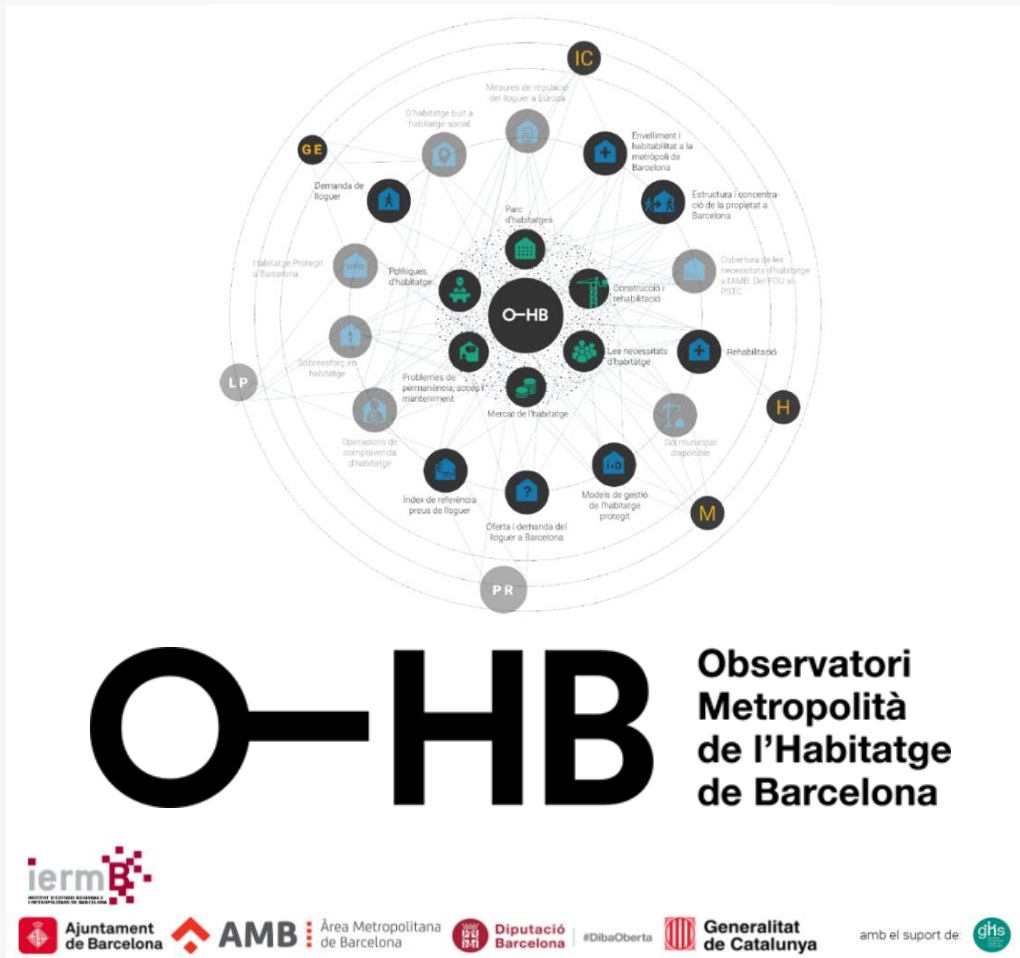

4

Regulating the real estate market

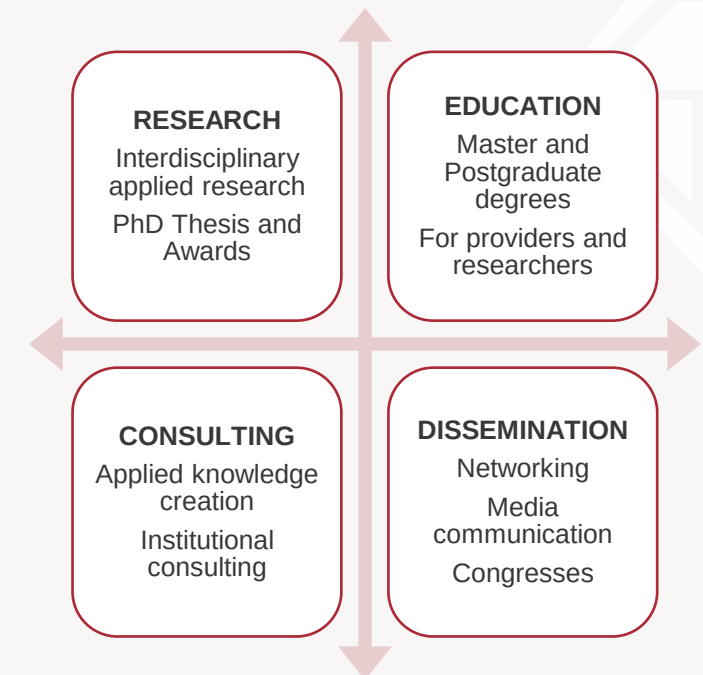

4.1 Data Mastering = Market Shaping

4.1.1 Metropolitan Housing Observatory (O-HB)

4.1.2 Barcelona Housing Studies Chair

- 4-year framework agreement extendable to 4 more years.
- 4 co-directors, one from each university.
- Annual budget of 150,000€, 25% from each university.
- 10% overhead for each university.

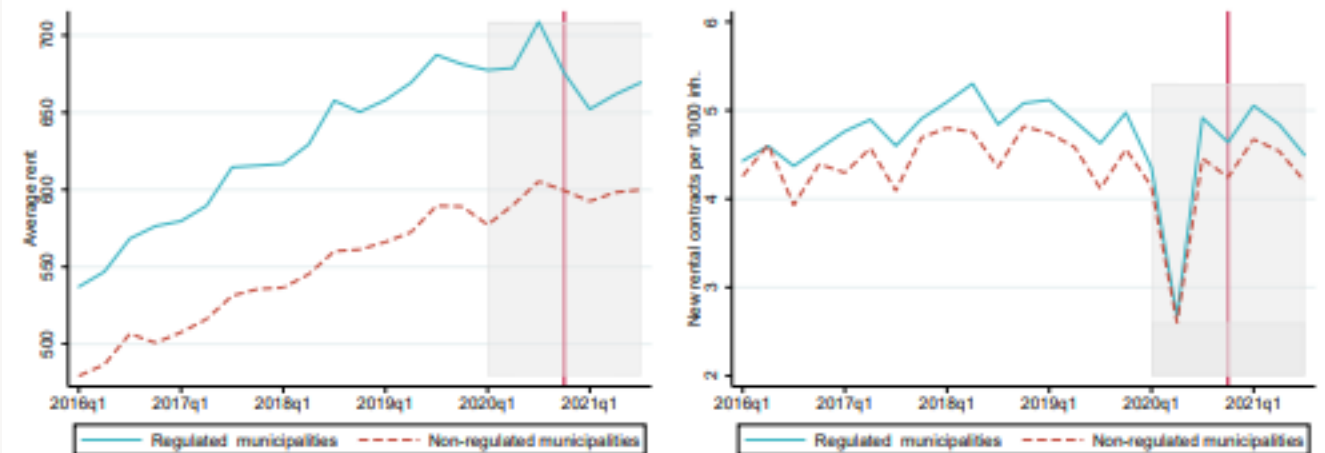

4.2 Rent regulation

- Reduction in rental **prices** and increase in the number of **contracts** signed.
- 2 parallel phenomena as a consequence of the COVID-19 pandemic:
 - Halt in the sector during lockdown.
 - Reduction in the demand for touristic apartments.

“Our results indicate that the [Catalan rent] regulation reduced average rents paid by about 6%. However, this price drop did not lead to a reduction in the supply of housing units in the rental market.

[In conclusion, the data] suggest that rent control policies can be effective in reducing rental prices and do not necessarily shrink the rental market.”

Figure 2: Evolution of rental markets in regulated and non-regulated municipalities.

(a) Average rent

(b) Contracts per 1000 inhabitants

4.2 Rent regulation

● In the 40 Catalan municipalities (38 #MRB) where the law was applied, the average rental price will drop by 7% ↓

● In the 32 municipalities with a tense market situation (all #MRB), where the law was not applied, the price will grow by 4.1% ↑

🔑 In all municipalities the name of contracts signed went up, from 6.9% where the law was applied and 7.2% where it wasn't.

⚠ In none of the areas the supply of rental housing was reduced and even the supply level was superior to pre-pandemic values.

4.3 Enforcement

- Law enforcement (in collaboration with building and urban planning inspections-sanctions) as a new pillar of **housing policy understood as a public service**.

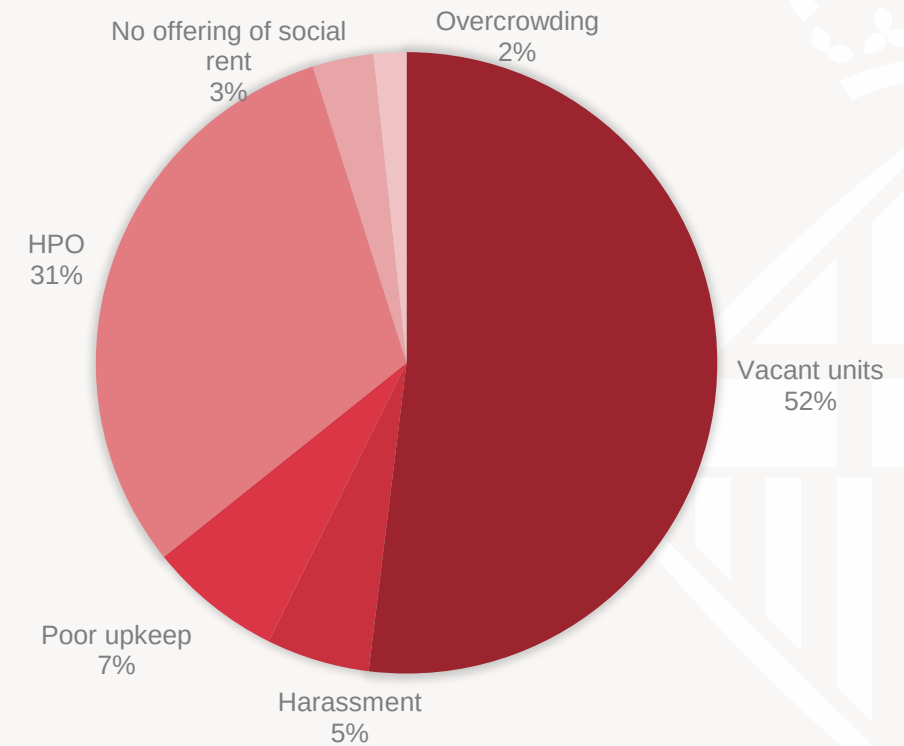

TOTAL INSPECTIONS

Type of action	inspections	proceedings	units
Mobilizing vacant housing			
related to sanction proceedings	1,571	661	950
vacant housing census	103,864		10,052
Real estate harassment		35	44
Affordable housing appropriate use	4,925	253	253
Improve building upkeep			
Related to the Department of enforcement		41	57
Related to the Districts' own tasks			
Offer a social rent		21	26
Identify unlicensed touristic apartments	9,964	8,824	8,824
Total (does not include vacant housing census)	16,460	9,835	10,154
<i>Total including vacant housing census</i>	<i>120,324</i>		<i>20,206</i>

4.3 Enforcement

› Sanctions

Imposed sanctions	87 sanctions
Value of imposed sanctions	2.53 M€
Units surveyed	121,457 units
Preliminary reports to guarantee the right of relocation for residents	630 reports (451 favorable and 121 unfavorable)
Regularization of rent in affordable units (HPO)	27 regularizations

5

Conclusions

5 Conclusions

- **Barcelona as an emerging, mission-oriented model (Mazzucato)**, based on symbiotic collaborations between public, private and community stakeholders.
 - **Intervene from the public sector.** Without a strong public intervention, nowhere and never in history, has it been possible to generate permanently affordable housing estates.
 - **Reach agreements with private, communitarian and commercial stakeholders.** Public commitment is necessary but not enough. There needs to be a whole set of alliances between different types of affordable housing providers.
- **The meantime**
 - The meantime will be long. And we cannot say to several generations that our solutions will bypass them.
 - The increase in housing supply (adequately diversified) will need to be done in parallel to the continued provision of **rental subsidies**.
 - But we cannot bear private suppliers' profit margins with public money. Therefore, the debate on **rent control** is inevitable.

CHALLENGES

1. The growth of social housing stock without **State/Federal funding & legal and regulatory umbrellas & friendly taxation schemes** is extremely difficult.
2. The complexity of multilevel governance. **Barcelona has not legislative power** for regulating the housing market. We are obligated to **lobby** continuously for a favorable and coherent regulatory framework.
3. The more housing and related assistance you can provide, the bigger the **expectation from the public**.
4. **The battle for land and development.** Limited future development opportunities (land exhaustion & zoning) make it difficult to **balance the historical distribution of social and affordable housing across the city**.

Lessons learned

1. Having a **mixture of housing models** (different affordability levels, different housing tenures, different providers) results in a social mix that may provide opportunity for all.
2. Social housing provides low-income households with **stability**, which has positive externalities in terms of employability, community building and inclusiveness.
3. **Public-private and public-community collaborations** are essential to grow and manage a social housing system, particularly when there is little Regional & Federal funding available.
4. We need more **core capital** for affordable build to rent, but also for **purchasing, renovating & rental PPPs**.
5. Evidence-based policies require investments in **data collection, management and research**.

Potential research areas

- **Collaborative housing** – assessment of social impact, governance schemes, third sector network economy.
- **PPPs** – long-term partnerships, potential to involve private investment into affordable housing, governance schemes.
- **Rent regulation** – impacts on affordability, private investment, tenure security and stability.
- **Touristic accommodations** – impact on housing market, gentrification, regulatory frameworks.
- **Inclusionary zoning** – potential to create affordable housing, social mixing, impact on housing development.
- **Health and housing** – COVID-19 impact on housing and health outcomes, effects on eviction moratoria's for improving health outcomes, different life expectancy in private, public and coop housing, etc.

Awards and future events

Premi	Projecte	Categoria	Any
Urbact Best Practice	UCER	Prevenió dels desnonaments i el sensellarisme	2017
World Habitat Award	Hàbitat 3 Programa de Cessió; La Borda	Millor iniciativa innovadora; Bronze	2019
